

Kocher + Beck is the world market leader in rotary die cutting technology and supplies innovative solutions in label printing, envelope manufacture, and sheet-fed and web offset printing. Having started out in rather modest premises in Stuttgart, Germany, Kocher Beck GmbH + Co. Rotary Stamping Technology KG has grown into an international corporation with production sites in Germany, Great Britain, the U.S. and Russia.

Today, Kocher+Beck employs roughly 520 people worldwide.

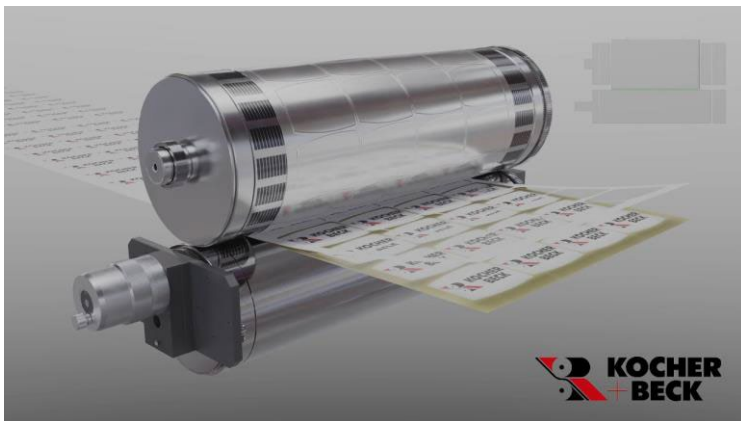

INDUSTRY: Manufacturing

LOCATION: Lenexa Kansas

PROBLEM: Managing vendor workorders and AP invoices

SOLUTION: Advanced document capture to facilitate achieve faster document access

BENEFIT: Streamlined filing process and better access to workorder and AP invoice documents when they are needed.

Problem: The AP process required too much labor to index scanned documents and the approval process without automation was too prone to errors.

Solution: The use of advanced capture and workflow automation to streamline their processes. With advanced capture, vendor documents are automatically indexed and routed through approval processes for completion and are easy to access when needed.

Benefit: The process of managing orders and invoices from vendors is more efficient and less prone to error. More documents can be processed with less effort, and documents are more available to users that need them to complete orders, and invoices are easier to approve and pay.

“When you automate your whole order management to AP invoice approval and payment processes you improve the overall efficiency and quality of the way you manage your company.”
